ALERT: Effective July 1, 2012, the Commission is required to deny an application for licensure and to suspend the license of any applicant or licensee who has outstanding tax obligations due to the Franchise Tax Board (FTB) or the State Board of Equalization (BOE) and appears on either the FTB or BOE's certified lists of top 500 tax delinquencies over \$100,000. (AB 1424, Perea, Chapter 455, Statutes of 2011)

Once it has been determined that an applicant or a licensee is on a certified list, the applicant or licensee has 90 days from the issuance of a preliminary notice of suspension to either satisfy all outstanding tax obligations or enter into a payment installment program with the FTB or BOE. Any such person who fails to come into compliance will have his/her license denied or suspended until the Commission receives a release from the FTB or BOE. The form for requesting a release will be included with the preliminary notice of suspension. The law prohibits the Commission from refunding any money paid for the issuance or renewal of a license where the license is denied or suspended as required by AB 1424. The FTB and BOE are currently expanding the certified lists from 250 to 500, but you can check if you are currently on the FTB's certified list at: www.ftb.ca.gov/individuals/txdlnqnt.shtml or the BOE's certified list at: www.boe.ca.gov/cqi-bin/deliq.cgi. If you believe you are on either list in error, please call the FTB at (866) 418-3702 or the BOE at 916-445-5167.

AUTHORIZATION TO RELEASE INFORMATION

Authority to provide the California State Athletic Commission with this information is established pursuant to Sections 18640, 18642 and 18643 of the Business and Professions Code. Disclosure of your social security number is mandatory pursuant to Section 30 of the Business and Professions Code and Pub. L.94-455 (42 USCA 405(c)(2)(C)) authorizes collection of your social security number. Your social security number will be used exclusively for tax enforcement purposes, and for purposes of compliance with any judgment or order for family support in accordance with Section 17520 of the Family Code. The social security number is also used to report and credit boxer pension fund payments in implementing Sections 18880, 18881, 18882, 18883, 18884, 18887, and 18888 of the Business and Professions Code. If you fail to disclose your social security number your application for initial or renewal license will not be processed AND you will be reported to the Franchise Tax Board, which may assess a \$100 penalty against you.

All items in this application are mandatory; none are voluntary. Failure to provide any of the requested information will result in the application being rejected as incomplete. The information provided will be used to determine qualification for licensure. Information on your application and physical examination report may be released to law enforcement agencies. Applicants have the right to review their application subject to the provisions of the Information Practices Act. The Executive Officer is the custodian of records.

THE DANGERS OF CUTTING WEIGHT AND DEHYDRATING

Unhealthy and dangerous weight loss practices continue to be a serious problem in combat sports. One recent study found that 39% of MMA fighters were entering competition in a dehydrated state. Heat illness and death in athletes have already happened in the sports of wrestling and MMA. It's been shown that excessive weight loss, rapid weight loss, and repeated cycling of weight gain/loss causes decreased performance, hormonal imbalance, decreased nutrition, and increased injury risk. Other life-threatening problems associated with improper weight loss and dehydration include:

- **Decreased Muscle Strength and Endurance:** Decreased blood flow to muscles makes them work less well.
- **Decreased Heart and Cardiovascular Function:** The heart works harder *and* less efficiently.
- **Reduced Energy Utilization, Nutrient Exchange and Acidosis:** With decreased blood flow to tissues, nutrients don't get delivered, and the body's waste products do not get removed as well. A buildup of acid occurs which changes cells' functions in the body.
- **Heat Illness:** This takes on four forms: heat cramps, heat syncope (loss of consciousness), heat exhaustion, and heat stroke (which may be fatal). Dehydration results in decreased blood flow to skin and muscles. This is followed by decreased ability to regulate body temperature. The ability to sweat becomes impaired and core body temperature can rise. This increases the threat of all of these to poorly hydrated athletes doing strenuous workouts.
- **Decreased Kidney Function:** Dehydration leads to decreased kidney blood flow and decreased kidney function. This contributes to the problems listed in the points here, in addition to decreased urine output, concentrated urine, and leakage of protein into the urine. (It is not known if these changes can result in permanent kidney damage.)
- **Electrolyte Problems:** Decreased kidney function results in imbalances of electrolytes such as unhealthy increases in potassium and sodium.
- **Mood Swings and Mental Changes:** All of the above contribute to increased mood swings, poor concentration and focus, disorientation and other mental changes.
- **Eye Trouble:** Dehydration can cause blurred vision and dry eyes.
- **Increased Risk of Brain Injury:** There are likely increased risks of brain bleeding and concussion.

DON'T:

- Don't use extreme methods for making weight such as excessive heat methods (rubberized suits, steam rooms, saunas), excessive intense bouts of exercise, vomiting, laxatives and diuretics.
- Don't use dehydration as a mainstay of making weight. In addition to the above, it puts you at risk of improper rehydration techniques — when, in reality, proper re-hydration takes several hours to days. (Many cases of intravenous fluids being used for rehydration after weigh-ins have been reported – this is a doping violation with several organizations.)

DO:

- Commit to year-round proper diet and training for proper weight control and body composition.
- By maintaining your weight year round near an appropriate competition weight and not competing in a weight class outside your appropriate weight class you will help avoid large swings in weight.
- Maintain a good state of hydration by drinking fluid throughout the day and staying hydrated during workouts.
- Follow nutritional programs that meet your needs for adequate amounts of calories from a balanced diet high in healthy carbohydrates, the minimum requirement of fat, and appropriate amounts of protein.
- Be wary of nutritional supplements as they are not regulated by the FDA and some have been shown to be harmful.
